Tinker Toys	electric trains	squishy circuits
Wooden Blocks	battery trains	qubits
Erector Sets	makey makey	play-doh (unopened)

OLV School is creating a Maker Space so that the students can explore the Engineering Process with everyday objects. This special classroom will be on the first floor near the Science Lab and will be utilized on a regular basis. Also, we now have a 3D printer that will be used by the Middle School students.

All donations can be dropped off in the pink bin near the general office or your child can bring in the items to his/her teacher. Bring this flyer to your office and see if you can get your co-workers to help with this appeal! Collections will be ongoing throughout the school year. Thank you for your support!
